

universal, tag, id, class, child, direct child, attribute, group, pseudo classes, pseudo elements

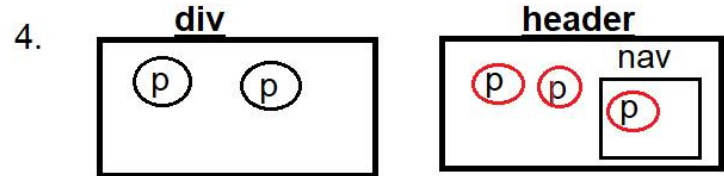

1. web page

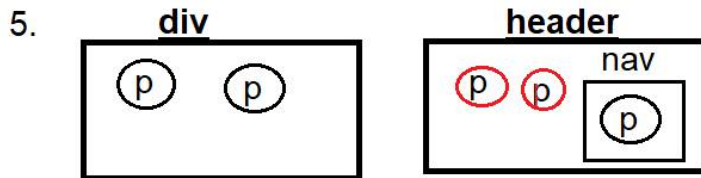

need same styles for all buttons
=> tag/element

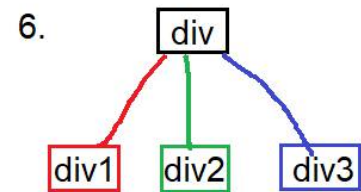

1 group of eles one style, 2 group of ele another style => class

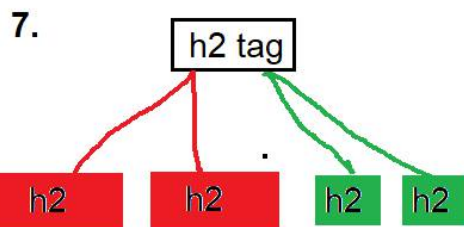

need styles for p which are placed in header & nav => child

need styles for p which are placed in header only => direct child

need spe styles for each and every div => id

need styles for h2 having same width or height => attribute

diff types selectors havgin same code/style => group
